Europa Coin (EURC) Whitepaper

Version 1.0 · June 2025

Abstract

Europa Coin (EURC) is a next-generation utility token designed for active traders, liquidity providers, and DeFi platforms on the BNB Smart Chain (BSC). With a fixed supply of 10 billion tokens, EURC enables fast, low-fee transfers and broad market participation. Unlike stablecoins, EURC is not pegged to any fiat currency; its price is fully determined by the open market.

---

1. Introduction

Digital assets and decentralized finance (DeFi) are transforming global markets by offering new opportunities for trading, yield, and interoperability. However, most assets are tied to existing fiat pegs or legacy models. Europa Coin (EURC) seeks to fill the gap as a flexible, market-driven utility token that is accessible, transparent, and community-oriented.

---

2. Mission Statement

To provide a transparent, efficient, and flexible digital asset for traders, platforms, and DeFi innovators, enabling liquidity and utility across the global crypto ecosystem.

---

3. Token Details

Feature	Value
Name	Europa Coin
Symbol	EURC
Chain	BNB Smart Chain (BSC)
Contract	0x80803EB10D5566C93EE90202c4bA520341814489
Decimals	18
Max Supply	10,000,000,000 EURC

Feature	Value
Type	ERC20 / BEP20 (fully standard-compliant)

4. Utility and Use Cases

- **Trading & Swaps:**
  Designed for high-volume trading and seamless swaps on DEXes and CEXes.

- **Liquidity Provision:**
  Enables deep, flexible liquidity pools for BNB, USDT, and other major pairs.

- **DeFi Integrations:**
  Suitable for lending, staking, and yield farming protocols.

- **Payments:**
  Fast, low-cost transfers on the BSC network for merchants, platforms, and users.

- **Institutional Trading:**
  Capped supply, transparent contract, and open market pricing make EURC attractive to institutional desks and OTC partners.

5. Key Features

- **Capped Supply:**
  10 billion maximum, no inflation or additional minting.

- **Transparent & Open:**
  Verified contract, open-source code, public audits, and published metadata.

- **Market-Driven:**
  Not a stablecoin; price set by supply and demand.

- **Interoperable:**
  Designed for integration with leading DeFi protocols, aggregators, and bridges.

6. Technical Architecture

- **Blockchain:**
  BNB Smart Chain (EVM-compatible, low gas, high throughput)

- **Contract:**
  Standard ERC20/BEP20 with capped supply; no hidden functions or blacklists.

- **Explorer:**

---

7. Governance and Transparency

EURC is governed by its community and developer team, with plans for progressive decentralization.
All major decisions, upgrades, and integrations will be discussed in public forums (Telegram, Twitter, GitHub).
Smart contract code and major updates are auditable and open-source.

---

8. Roadmap

2025 Q2

- Launch on BNB Smart Chain
- Initial liquidity seeding on PancakeSwap
- Trust Wallet, CoinGecko, and CMC submissions
- Community growth and partnership outreach

2025 Q3

- Listings on major aggregators and DEXs
- Integrations with DeFi protocols
- Governance model proposal and community vote

2025 Q4

- Cross-chain bridge exploration
- Institutional partnerships
- EURC staking and ecosystem incentives

---
